

KAMAU JOHNSON

ML ENGINEER II DATA SCIENTIST II
SOFTWARE DEVELOPER

PERSONAL PROFILE

Johnson is a tech-savvy Computer Science professional and Data Scientist, aspiring Machine Learning Engineer, and Software Developer. Leverages analytical thinking and programming expertise to build predictive models, data pipelines, and actionable insights from complex datasets. Recognized for leading projects and delivering measurable results, with a strong drive to contribute to innovative, data-driven organizations.

PERSONAL ACHIEVEMENTS

I am an avid hackathon enthusiast and have proudly showcased my work in various innovation competitions :

Track Record

Power Hacks Hackathon – 4th Runners-Up
October 2024.

- Built a statement verification app using HTML, CSS, JS, React Native, and PHP. Led full-stack development. This was my first hackathon, earning 4th Runners-Up and sparking my passion for innovation.

Blockchain & Web3 Hackathon – Winner
April 2025 \$1,000 Prize

- Co-developed BebaPay, a tokenized recycling platform on Cypherium Blockchain. Led smart contract implementation. Won 1st Runners-Up out of 30+ teams.

SHORT COURSES

- Diploma in using Python for Data Science
- Certificate in Data Science
- Certificate in Python
- Statistics for Data Science
- Mathematics for Data Science
- Mathematics for Machine Learning
- SQL for Data Science

CAUSES

Science and Technology
Social Services
Economic Empowerment
Human Rights

WORK EXPERIENCE

DATA SCIENCE INTERN

(AUG – SEP 2024)

CODSOFT

- Conducted data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets using Python to uncover patterns and trends.
- Developed and evaluated machine learning models to support predictive analysis and data-driven insights.
- Created data visualizations and analytical reports to communicate complex findings clearly to stakeholders.
- Optimized data preprocessing workflows, reducing data preparation time by 30% and improving the efficiency of model development.

INDUSTRIAL ATTACHMENT

AGRO CHEMICAL & FOOD COMPANY LIMITED (ACFC)

(JAN – MAR 2025)

- Supported internal monitoring processes that helped reduce network vulnerabilities by 25% through improved data review and system checks.
- Analyzed network logs and operational datasets to identify patterns, anomalies, and performance trends.
- Gained hands-on experience in data analysis, network monitoring, and basic data-driven problem solving within an enterprise environment.
- Assisted in monitoring network systems and operational data to ensure efficient system performance.

EDUCATION HISTORY

BACHELOR'S DEGREE IN COMPUTER SCIENCE

Catholic University of Eastern Africa (CUEA) : Ongoing

DIPLOMA IN COMPUTER SCIENCE

Zetech University (ZU) (2023–2024)

APPLIED DATA SCIENCE

World Quant University (2025–2026)

SOFTWARE DEVELOPMENT

Power Learn Project (2025–2026)

DIPLOMA IN LEADERSHIP AND MANAGEMENT SKILLS

Alison University (2024–2025)

KENYA CERTIFICATE OF SECONDARY EDUCATION

Anestar High School (2019–2022)

KENYA CERTIFICATE OF PRIMARY EDUCATION

Muhoroni Furaha Primary School (2010–2018)

SKILLS

- Strategic problem-solving acumen: demonstrates an innate ability to devise innovative solutions to complex challenges through analytical thinking.
- Resilience & adaptability: able to adapt at navigating fast-paced environments and thriving under pressure while delivering excellence.
- Analytical acumen: excels in breaking down complex problems and crafting data-driven strategies for impactful outcomes.
- Social impact: committed to leveraging skills and technologies to create solutions that address societal challenges.
- Collaborative leadership: excels in fostering teamwork and guiding diverse groups toward shared goals in dynamic environments.
- Tech savvy enthusiast: passionate about exploring and mastering cutting-edge technologies to remain ahead of industry trends.

INTERESTS

- Coding challenges & hackathons
- Tech community engagement
- Innovation for social impact
- Travelling and exploration activities such as camping

PROJECTS

Project Lead | Full-Stack & Data Analysis

May, 2025

BEBAPAY

The proposed project is a virtual online platform that allows users to earn rewards by participating in sustainable recycling activities and facilitates secure, fee-free digital transactions.

- Spearheaded a team in a hackathon to develop BebaPay, a blockchain-powered Recycle-to-Earn platform, securing first place for the project.
- Analyzed user and transaction datasets to optimize reward distribution, identify behavioral patterns, and improve engagement by 30%.
- Designed and implemented data pipelines and analytical dashboards to monitor recycling activity, transaction volumes, and validator performance.
- Directed the full project lifecycle, including system architecture design, data-driven decision-making, and collaborative problem-solving, delivering a scalable, secure, and user-focused platform.

Data Analysis & Predictive Modeling

January, 2026

TITANIC: MACHINE LEARNING FROM DISASTER ANALYSIS

The proposed project is a data science initiative to predict passenger survival on the Titanic based on historical passenger data, using machine learning models to identify key factors influencing survival.

- Spearheaded a team in a hackathon to develop BebaPay, a blockchain-powered Recycle-to-Earn platform, securing first place for the project.
- Analyzed passenger datasets to uncover patterns related to demographics, ticket class, and travel conditions, informing model feature selection.
- Designed and implemented data preprocessing pipelines, handling missing data, encoding categorical variables, and scaling features for machine learning workflows.
- Directed the full project lifecycle, including exploratory data analysis (EDA), model training, evaluation, and reporting, delivering actionable insights from historical datasets.
- Developed visualizations and analytical reports using Matplotlib and Seaborn to communicate trends and model results clearly.

Data Analysis & Predictive Modeling

February, 2026

FOOTBALL PERFORMANCE DATA ANALYSIS

The project involves analyzing football match statistics to identify performance trends, player contributions, and game patterns.

- Collected and analyzed match datasets to extract insights on team and player performance.
- Performed data preprocessing and feature engineering to structure data for analysis.
- Created visualizations to communicate trends and performance patterns clearly.
- Applied statistical analysis and predictive modeling to evaluate player impact and game outcomes.
